

If you can't see it, how can you fix it?

**WE FIXED IT,
SO YOU CAN
SEE IT.**

ProVison Animal from NES Health lets you SEE and FIX the Body-field, a complex, structured network of fields that interpenetrates an animal's physical body.

Up until now, to recognize possible muscular pain, restrictions and illness in an animal, you relied mostly on physical symptoms observed with the naked eye. Is the range of motion restricted? Is there a general decline in energy and performance? Has it lost its appetite? Has it become more irritable?

But now, with just a single click ProVison Animal lets you SEE the unseen.

- **SEE the animal's physiology**
- **SEE beyond the animal's symptoms.**
- **SEE the information the body needs to heal itself.**
- **SEE your animal get well—stay well!**
- **And, because the animal gets well and stays well, you'll also SEE your practice grow.**

The Animal WellNES System takes the guesswork out of diagnosis and treatment.

When either the information or energy within the body becomes distorted, regardless whether it's a human body or an animal body, health deteriorates. And since we've had such great success helping humans, we wanted to make a version specifically for animals. An Animal WellNES System that lets you detect and correct the information and energy so it can return to optimal health. The Animal WellNES System significantly reduces the time needed for healing.

The Animal WellNES System helps you Detect and Correct patterns of energy in an animal's body.

Detect with ProVison Animal

The body is a most miraculous healer, especially when it receives the correct information it needs to heal itself. ProVison Animal allows you to See The Unseen, identifying issues and allowing you to stimulate an animal's innate healing responses.

With a single click, and in seconds, ProVison Animal scans the body-field, assessing its energy and information and returning a richly detailed overview, including multiple screens and physiologically accurate graphics. You can immediately:

- See beyond an animal's symptoms
- See the information an animal needs to heal
- See the distortions in information and clear energy blockages
- See the personalized protocol for healing

Correct with miHealth

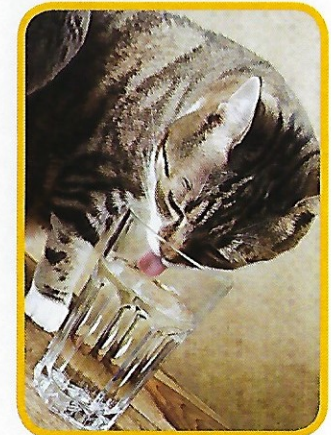

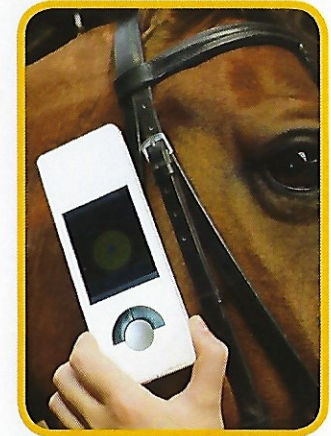

The miHealth is a powerful, yet safe handheld healing device. As seen on the Doctors Show, the miHealth is non-invasive and has been extensively clinically-researched, incorporating the proven benefits of biofeedback and pulsed electromagnetic field therapy (PEMF) to locate, unblock and release energy blockages.

ProVison Animal tells you exactly where to use the miHealth, which delivers immediate relief and rejuvenation to the animal, clearing pathways for information to flow through its body properly.

Enliven with Infoceticals

Infoceticals are a wide range of liquid remedies imprinted with proprietary bio-information, which correct distortions and re-imprint the animal's control system back to its original and optimal blueprint.

ProVison Animal, based on its assessment of the animal's body-field recommends the precise Infoceticals most critical for the animal's wellness and performance, and in the fastest time.

"The brand new device you can't live without!"
