

# Know Thy Self

## INTEGRATIVE MENTAL WELLNESS HUSTLE

I met with my physical therapist, and he suggested I try counseling. I have been trying to lose weight over the past year. Now I decided I wanted to have weight loss surgery and was concerned that my depression might return.

I became a social worker because the voices in my head told me to.

Social Workers need vacations, psychotherapy, and a good laugh.

This season is about supporting you in your journey of self-discovery. To accomplish this, I have suggested two things. Purchasing "Heal Thy Mind: Seven Strategies Towards Mental Wellness, and Happiness, and Success" and "Journal Towards Wellness, Happiness, and Success." Both are available on Amazon for a low cost. However, if money is a real challenge, please don't hesitate to contact me directly. I hope you can get the best out of this process. Remember that you also don't need the books to listen: you have choices and can listen to this podcast in any helpful capacity.

BIOFEEDBACK

# NES Health System

The NES technology works with the energy of the body.

The scan is done via ZOOM from your chosen quiet and confidential place. The scan is free for the month of April 2023. So let's JUMP back into health.

The bioenergetic assessment examines how energy and information flow from within the body. It gives a guide to what areas may need more attention and support.

You can see where the energy sources, energy strength, and energy flow, along with the mind, body, and emotions, are distributed.

When things come up out of balance, it confirms what I need to work on. This includes physical and emotional concerns. I feel the energy: I am moving towards wellness. I am healthy..

# STARTING THIS MONTH

I am looking for women over the age of 25 years.

I am looking for professionals: psychologists, physicians, dietitians, coaches, trainers, spiritual/religious teachers, childcare providers, etc.

I am looking for individuals wanting to change.

I am looking for people willing to make a financial commitment.

Healing in This Moment This is an excellent option for you to explore. As a relational psychotherapist, I provide weekly group therapy sessions. This is a private, confidential, safe space to connect with other professional women. Women who are ready to heal, change, and try something different, something new, and something beautiful.

I AM LIKEABLE;  
I AM LOVEABLE;  
I AM  
GOODENOUGH

GRATEFUL

Here are five ways to increase wellness within a relationship.

1. Work on yourself. You have the power to heal yourself. The answers are within you, and psychotherapy helps with this process.
2. You can find a diet filled with nutritious and detoxifying foods. The gut is the second brain and benefits from minerals, vitamins, essential fatty acids, Omegas, and many organic green vegetables.
3. Move the body; move the cells. The movement of cells creates space for healing to occur from within. Energy is health; fatigue is the first sign of illness.
4. Be playful and childlike, not childish. Have fun, laugh, be goofy, and rediscover who you are before all the traumas.
5. Work to silence the mind and control the thoughts. But, again, the ego will trick you as the ego knows you better than anyone or anything.
